SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	**MS: 2012/AJEA/2177**
Title of the Manuscript:	**NATURE OF TOMATOES MICROFLORA UNDER STORAGE**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
I believe that the introduction does not address the objectives of the manuscript. The objectives are not detailed in the introduction. Moreover, the goals need a foundation, ie what is the importance to do this work???? .... How important is the study of the microflora of refrigerated tomato??. The introduction presents further things such as paragraph 2....the history of the tomato ... (I think it must be removed). In materials and methods lack the statistical analysis methodology on? I think that this work is of importance in a particular geographical area, but it would be much more interesting if the work will focus on the resolution of a problem with this type of product. Currently, basic research is conducted using more modern methodologies. I do not mean that this work is useless, I would advise enrich this research, for example with a barrier of preservation.	The historical aspect removed. Few additional corrections were made.
