SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	**Overall the manuscript is interesting, authors have really made a great attempt in developing coatings and applying them on fruit. However, I have some reservations; if addressed then it would be a perfect one indeed** **There needs to improve the language of the paper. Secondly, authors need to improve the figures submitted to make them rather more appealing and informative** **There needs a sincere contribution specifically in the results interpretation as longevity in discussion and explanation are generally not desired**	The language of the paper was revised again and improved English when required. The figures are the explanatory and easy understanding. In the literature, no find much information on that fruit.
Optional/General comments
