SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**In text wherever the changes are needed the word or part of the sentences highlighted with comments in the margin of the text.** **The minor revision is required and the details are mentioned in the manuscript. It would be appropriate if some recent references could be incorporated in the manuscript.**	• I have gone through the MS and effected all the changes suggested by the reviewer. • All references have been revised and where available some recent references have been incorporated
Minor REVISION comments	There are some minor revisions which have been annotated in the text, highlighted with comments written there.	• The suggestions given by the reviewer have been considered and incorporated in the MS
Optional/General comments	A very interesting paper and would like to congratulate the researchers. The information presented here could be used as a baseline for implementing the research idea and results for soil fertility management in Tanzania where these elements are major constraints for crop production. I strongly recommend the publication of manuscript with some minor revisions.	Thanks
