SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	The author(s) should completely read the manuscript to make sure that all language and typographical mistakes are corrected. Change the title as indicated. Correct the experimental design and label them properly. Explain the results fully with the corrected experimental design. The discussion part should have more details on the antioxidant activities of the enzymatic antioxidants such as CAT, SOD and $GP_{X.}$ Histopathological studies should be labeled correctly with proper legends. Use a standard magnification for all the micrographs, possibly the highest. Many of these figures are not showing the details explained in the legend.	
Minor REVISION comments	Add more reasons to support your justification to conduct this research. Authors names and years should be used in the text wherever it is necessary e.g. Line 43, According to (3) ----------	
Optional/General comments	Only one type of English (British English or American English) should be used. - do not use too long sentences or combine the sentences, at times some sentences are too simple ,use the standard format to deliver the message.	

	-main headings can be in capital letters.eg: INTRODUCTION. -do not use so many paragraphs, for that also use a standard format, like when dealing with a new subject or new matter only.
