SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**Abstract was not structured. Therefore was not in line with Journal format. The manuscript was not in accordance to the journal format. A lot of work is needed here.** **Is this work visible? Especially with the use of irradiation method on underutilized legume.** **I believe this method is costly and cannot be easily accessible by the farmers involved or industries in Nigeria.** **From Iwo, Osun State to energy centre, Abuja (very far). This legume when properly dried can keep for longer period of time (more than 6 months). The hard coat also aids the keeping quality. This is just the reviewer's view about the work.** **Anyway, the work provides information on the quality of the legume using irradiation method**	Thanks for the contributions. All the corrections have been effected.
Minor REVISION comments		
Optional/General comments	This is an interesting work. Authors should download the **instructions** to author and **template** for this article. See more comments on the manuscript
