SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1. Developing tourism was the direction of the efforts of many countries. But to develop the tourism industry, the region must have the value of tourism, such as landscape, humanity, history or culture etc. The author should be emphasized that Serbia has the potential to develop the tourism industrial. 2. There are a lot of means to develop tourism industrial. This article is to emphasize to attract TFDI. Recommended that the author should to explain the TFDI is important and necessary in Serbia. That could strengthen the appropriateness of this study. 3. Line 114 "1.1. Bargaining power of buyers", the number order maybe is wrong? 4. Section 2 of this article is to describe MICHAEL PORTER S "FIVE FORCES". These like the content of textbooks. The content can modify to the related literatures about the applications of Five Forces Analysis model in TFDI. 5. If five forces model is used for discussing how to improve the tour industry's competition advantages of Serbia, it will be suitable. But this study discusses how to manage and attract	

	TFDI. I don't think this is a suitable model. And the author has not mentioned any relevant literature proves such this model is suitable. 6. The attributes of this study is a qualitative research. Qualitative research has focused on logic and rationality of inference process. But the whole article structure seem loosen.	
Minor REVISION comments		
Optional/General comments
