Compulsory REVISION comments	The Article it is written in a simple enough manner, needs to be checked and documented references, for example equations (1.1) and (1.2)	We have given references to equations (1.1), (1.2) and (1.3)
Minor REVISION comments	Abstract is not clear enough manner, needs to expand more	We have expand the abstract
Optional/General comments	**General observations:** There in the references lack of coordination in the line between the different sources, where it is used to slash title search and other times to the reference name Example Notice No. reference 23, 24 and others. Intellectual and scientific content is good, thorough internal documentation in some aspects, it is better if it works in all parts of the research, scientific integrity is intact, and the ethics of scientific research sufficient.
