SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	**2013_BJAST_8674**
Title of the Manuscript:	**A Four Country Comparison: Special Education in the United States, China, India and Thailand**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
In this revision, the author has added two sentences (lines 421-422 and lines 508-510). The first sentence restates the goal of the study, and the second sentence asserts that no statistics are available for the measures studied. This is not an adequate response to the reviewers recommendations for changes. The author needs to clarify and provide evidence regarding the extent to which the 2 schools studied in each country can be said to be representative of the countries. The author also needs to provide a section clarifying the limitations of the study, in this regard. The author also needs to clarify in the results section that the statistics given only apply to the schools in the study. This needs to be clarified in the tables as well as in the narrative; e.g., in the first two sentences of the results section.
