PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	**2013_IJBcRR_3639**
Title of the Manuscript:	**Evaluation of Anti-hyperlipidemic Effect of Aqueous Extract of Moringa oleifera Leaves in Alloxan Induced Diabetic Rats**

General guideline for Peer Review process is available in this link:
(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

- This form has total 9 parts. Kindly note that you should use all the parts of this review form.

PART 2: Review Comments

	Reviewer's comment The corrections in the manuscript are highlighted in red fonts, so the author should critically follow all the steps on the manuscript as indicated by the reviewer.	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	The authors should do a lot of revision before this work can be accepted for publication.	
Minor REVISION comments	The Authors needs to look at their experimental design, results and then reconcile it with their discussions, before the work is accepted.	
Optional/General comments	The paper can be accepted for publication, if the authors makes general revision of their work, particularly their experimental design must be looked at very seriously, the topic of the research should be modified as corrected on the manuscript. The authors should critically look at their discussion on the effect of *Moringa oleifera* on lipid profile and should give more emphasis on hypoglycaemic effect of the extract as the lipidaemic effect of the extract is not forthcoming as indicated on Table 2. They should look at their references closely and try to effect some minor corrections according to journals format.
