SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**There is a need to implement the proposed method with some standard dataset and most important to compare with other available state of the art techniques. It should be helpful to show the time complexity of your method with already existing methods.** **There should be more figures, which show original speech and encrypted speech signal.**	
Minor REVISION comments	Author needs to rearrange the related work such as ref [6] is published in 2012, where as it that ref[7] is an addition to ref[6], but ref[6] is published in 2010. So check other references too.	
Optional/General comments	Method seems interesting.
