SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**1. The style of referencing should be used i.e. If APA use all authors for the first time, then for successive use et al or just number your sources of information** **2. Describe somewhere the word destigmatization** **3. Stigma and missed meds or adherence was measured by several studies and it maybe proper to use those to add to your information. The publications have been included for you to add on your information in your article** **4. Your discussion of results is not specific and is not supported or related to other authors. Bring out the quantitative summary of your results in the discussion and conclusions** **5. Check for proper sentencing and writing correct sentences** **6. Avoid the use of "we" or "I" refer to this paper or in this study etc**	
Minor REVISION comments		
Optional/General comments	It would be proper to add a little bit on how privacy was maintained when collecting data, especially for the interviews seeing that this is a very sensitive topic
