SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The language of the manuscript needs complete revision. It seems to me that the manuscript is translated from Arabic to English through Google. Whole manuscript should be revised for the language. Sub-headings from the abstract should be deleted. Materials and methods section should be clearly defined. Is LC_{50} of Oreochromis considered for the selection of doses? It is not correct. In the histograms the concentration is mentioned two times, below and in the side, it should be at one time. Caption of the figures should be corrected.**	
Minor REVISION comments		
Optional/General comments	A complete revision of the manuscript especially the language is required.	

Note: Anonymous Reviewer
