SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1. The logicality of this paper is not very appropriate, the authors should be rearranged especially for Part 3. RESULTS AND DISCUSSION. 2. It seems too simple of the description of Part 3.6 and Part 3.7, the authors should describe the kinetic studies and characterisation of the product in detail. For example, FTIR is not very enough for the qualitative characterization of product.	
Minor REVISION comments	The usage of English may be enhanced.	
Optional/General comments
