SDI Review Form 1.6

Journal Name:	**British Journal of Mathematics & Computer Science**
Manuscript Number:	**Ms_BJMCS_19962**
Title of the Manuscript:	**A Fuzzy approach for solving three level quadratic programming problem with stochastic parameters in the objective function**
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The authors must to give the AMS 2010 Classification.** **The authors must to give the same size of the mathematical characters and fonts. In some sections are bigger that of others.** **In the conclusions must be included some calculated parameters (or complexity, dimension of algorithm) showing the improvements obtained. The journal requires to a major analysis in the two senses because the work presented required!** **The authors must to include as appendix the main results used (not including proofs).** **The authors must to review the redaction and orthographic, likewise as editing errors**	AMS2010: 90C15; 90C70;90C99. Keywords: stochastic programming; fuzzy programming; three level.
Minor REVISION comments		
Optional/General comments
