SDI Review Form 1.6

Journal Name:	**British Journal of Mathematics & Computer Science**
Manuscript Number:	**2015_BJMCS_17267**
Title of the Manuscript:	**Symmetric Rings with Involutions**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The subjects of the article are *-symmetric rings *-reversible rings and *-rigid rings. Let R be a reduced ring and n any positive integer. The author proves that if R is *-symmetric, then R[x]/<x^n> is a *-symmetric ring where <x^n> is the ideal generated by x^n. Apart from this (main) result, the author examines a number of interesting examples and elementary results.**	
Minor REVISION comments	I noticed some typos. For example instead of: 3. Some elementry results (p. 6) must be: 3. Some elementary results.	
Optional/General comments		

Reviewer Details:
