**SDI Review Form 1.6**

**PART 1: Review Comments**

| | **Reviewer's comment** | **Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)* |
|---|---|---|
| **Compulsory** REVISION comments | **There are gender difference and large range of ages for the subjects used in this study. Does the age/gender affect the contents of bone tissue samples?**<br><br>**How was the sample size determined? Based on statistical power or sample availability?**<br><br>**The measurements for each element in this study have outliers (extreme large data comparing to other data points within the sample group, shown in Fig 1). The author should justify the validity of Student's t-test, such as test the normality or switch to Wilcoxon test (Mann- Whitney test).**<br><br>**P values should be adjusted for FDR to address the multiple hypothesis testing.** | |
| **Minor** REVISION comments | | |
| **Optional/General** comments | | |
