SDI Review Form 1.6

Journal Name:	**Ophthalmology Research: An international Journal**
Manuscript Number:	**2013_OR_5877**
Title of the Manuscript:	**Cuckoo's Search Algorithm based Technique for Exudates Detection in Diabetic Retinopathy**
Type of the Article	**Research Paper**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**General:** **The work was done in the past – use past tense to describe it.** **The mathematical symbols are not consistent.** **The citation style is not standard conform.** **For a more detailed review, please find an annotated version of your paper attached.** **Introduction:** **There is no clear thesis.** **No motivation is given.** **The introduction talks about eggs and birds and not about problems and their solutions.** **Methodology:** **The data is not discussed.** **Results and analysis:** **The result analysis is not clear.** **As a direct consequence, there is no way of assessing the results, presented in Table 5.1.** **Conclusion :** **The conclusion lacks a thesis.**	
Minor REVISION comments		

Optional/General comments	The following sentience comes one to one from: Yang, X.-S., and Deb, S. (2010), "Engineering Optimisation by Cuckoo Search", Int. J. Mathematical Modelling and Numerical Optimisation, Vol. 1, No. 4, 330–343 (2010). "If a host bird discovers the eggs are not its own, it will either throw these alien eggs away or simply abandons its nest and builds a new nest elsewhere." This sentence was discovered, because the authors forgot to change the reference. To be specific, [42] in the paper indicates that the passage / sentence was taken from another source.
