

SDI Review Form 1.6

Journal Name:	American Chemical Science Journal
Manuscript Number:	Ms_ACSJ_21692
Title of the Manuscript:	Removal of High-Concentration Fe(III) by Oxidized Multiwall Carbon Nanotubes in a Fixed Bed Column
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Not necessary	
<u>Minor</u> REVISION comments	Not necessary	
<u>Optional/General</u> comments	This article described the adsorption behavior of modified MWCNTs to removing of Fe(III) through batch and continuous flow fixed bed experiments. The objectives and experimental part were clearly described in the manuscript. The results and conclusions obtained were well discussed (based on interesting results) and appear promising to future applications.	A thousand thanks for your comments.
