**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory REVISION comments</b>	<p><u>Methods</u>: in this session it should be said something about BS (instead of referring to literature only) just to give an idea about what it is based on the paper (1).</p> <p>Statistic analysis should be described even if they are mainly descriptive (2)</p> <p>Figure and table should be numbered f.i: figure 1 and table 1, given that figure is cited before table, it should compare as first in the manuscript</p>	<p>We added a sentence in introduction section about BioSense data use. In the method section we specified that 14 selected syndromes are actually BioSense syndromes.</p> <p>This study represents one of the first an innovative attempts to use automated surveillance data for study of chronic conditions. This is a simple descriptive study without testing any hypothesis. Results of this study can be expanded further in our future publication with more sophisticated statistical analysis.</p> <p>Changes made to address to figure and table numbering comment.</p>
