

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Advances in Research
Manuscript Number:	2014_AIR_9161
Title of the Manuscript:	Environmentally Favourable and Unfavorable Bacteria

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>It is good to find that the authors have taken tremendous effort to correct the manuscript in a short period of time. Now the manuscript seems to be much in order. But still it needs certain minor revisions at few positions like those mentioned as below</p> <p>Line 23: Remove 'There are'</p> <p>Line 47: 'heterotrophic' need not be put in brackets. Sentence needs to be reframed</p> <p>Revision of the title also seems to be much better than the previous one.</p>	<p>Line 23: The sentence was adjusted as suggested by reviewer 1.</p> <p>Line 47: The correction was done and the sentence was rewrote to "Most bacteria are heterotrophic i.e. they are unable to manufacture their own organic food being dependent on external sources."</p>
