Subject: RE: Request for editorial decision for manuscript number 2014_AIR_9073

I went through the manuscript files and referees comments, authors responses. To my opinion the manuscript is suitable for publication in its present form. While it could eventually be shortened, the more detailed version seems very suitable for an open access journal like 'Advances in Research'. The amount of novelty is limited, but the application is carefully documented and thus of interest for the potential readership.
