SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ul style="list-style-type: none"> - Abstract and line 394-396: Considering the number of data obtained, the conclusion must be based on the research results instead of "<i>studies with larger sample size are needed....</i>" -More information about the population are needed like life style and contact with the sunlight for giving support to Results and Discussion. - The Authors should improve discussion of the data for Table 1. 	
<u>Minor</u> REVISION comments	<ul style="list-style-type: none"> - All the abbreviations must be identified on the beginning of the text. - It is necessary to standardize the terminology using "gender" instead of "sex" - Line 151: change ml - mL -Page 292: We suggest that the title of the Table 3 could begin with "<i>Urinary excretion...</i>" (take away the term "24 hour") - All the parameters analysed must be in mmolL/24h instead of mmol/24h. If there any ethical issue, please clarify. 	
<u>Optional/General</u> comments	<ul style="list-style-type: none"> - The authors could do the dosage of vitamin D in others investigations.
