

**SDI Review Form 1.6**

Journal Name:	<a href="#">Advances in Research</a>
Manuscript Number:	2014_AIR_14362
Title of the Manuscript:	Relationships between mild/severe knee joint pain and fall risk assessment items in elderly females
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	1. The purpose of the study and the issues to be resolved by the study were not stated clearly in this manuscript. I cannot understand what the authors meant by examining differences in fall risks between females with and without knee pain. 2. Also, I cannot understand the implications of the study. What impact does the study have?	
<b><u>Minor</u></b> REVISION comments	1. How did the authors select the 392 subjects from the 964 individuals? The authors should show selection criterion. 2. What is the background of study subjects? Ambulatory patients (outpatients) or general population?	
<b><u>Optional/General</u></b> comments	1. Since I cannot understand the purpose and the impact of this study, I cannot evaluate the value of this manuscript. 2. Information shown in the Table 1 is too much and so complex. Instead, easily comprehensible figures will help readers to understand implications of Table 1.
