**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Compulsory</b> REVISION comments	<p>Line 25; article did touched on 'robust regulatory', however not much explanation was given esp the differences on safety std btw developed mkt vs emerging mkts, whereas this is crucial factor in determining the issue of injury.</p> <p>Line 106; Graph 1: graph only provides general view on factors but without clear relationship btw Injury, factors &amp; consequences. Eg how does GDP related to Injury @ safety std? The graph should clearly show the link btw these variables ie how GDP &amp; safety Std have an inverse/negative associations with injury, snc this study intend to prove such relationship.</p> <p>Line 103; may be other factors are more relevance to link with injury eg level of edu/qualification among employees; degree of safety enforcement, type of employees - skilled, unskilled...etc</p> <p>Line 170; ...a significant relationship - how do v measure this..is it only via secondary data of all countries involved? Whereas there is no statistical test was made....it would be better if only ...'an association' @ relationship....is suffice.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	Overall can be improve & acceptable
