

SDI Review Form 1.6

Journal Name:	Advances in Research
Manuscript Number:	2014_AIR_15197
Title of the Manuscript:	Effect of Sinusoidal Excitation on Fluid Flow across a Cu-Mica Microchannel
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>In this manuscript, the author investigated the effect of gravity, temperature, pulse width vibrations (PWM), and sinusoidal excitations on the flow of methanol, ethanol, and chloroform through an indigenously fabricated Cu-Mica micro-channel for automatic identification of fluids. However, the author should give more explanation to Fig 1 by explaining what was observed in the snapshot of Cu-Mica micro-channel at each elevation.</p>
