**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	The author(s) highlighted current advances in the utilization of cassava cyanide as far as its industrial application is concerned. They however veered off completely from the subject matter by their inclusion of line 278 to 330 in the discourse. This section should therefore be removed from the article.	The topic has been modified to be in agreement with the content. The content is the true intent and scope of the study
<b><u>Minor</u></b> REVISION comments	The references should be arranged in alphabetical order if that is the stated guideline of the Journal.	Ok. This has been done.
<b><u>Optional/General</u></b> comments	Many of the references listed by the author(s) are not cited within the text, also some cited literature are not listed in the references. The author(s) should tidy these up.  Since it is a review article, the issue of plagiarism could be reduced to the minimum if the author(s) endeavour to provide relevant citations from literature to back up the article.	Ok. All cited references have been listed in the references.  Ok. This has been done.
