PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
As it was mentioned in the text that "The total number of goldsmiths at present in this cluster is 5822 and all of them are male", their study population is too low to make a clinical decision in goldsmiths. Study population must be enlarged.	Addressed and explained in the lines from 95 to 98 in section no 2.2 at page 4.
