**SDI Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	<p>I would recommend, the Figure 3 a-q should be more clear. It is very difficult to read the dimensions of the test specimens.</p> <p>Fig 4, the typical detail of lateral restraint can be presented in a bigger scale. For both Fig.3 and Fig.4 the colour and width of the lines of the drawings may be improved, in order to make it easier the reading and understanding of these important figures of the paper.</p> <p>The letters in Fig. 5 should be in a bigger size.</p> <p>I think Fig 7-12, will look better if the writings don't have the shadows behind.</p>	All figures have been clarified.
<b><u>Optional/General</u></b> comments	<p>Fig 13 - You can add the % in brackets for the x axis (for the lap length/ beam depth).</p> <p>As you are adding an abbreviations session at the end of the paper, I would suggest to include there all the abbreviations used in the paper. Or you can choose to put the explanations of the 2 abbreviations presented in the end of the paper, in the text and take this session out from the end of the paper.</p>	<p>The % will make conflict in get data.</p> <p>The session have been included all the abbreviations used in the paper.</p>
