| <b><u>Compulsory</u></b><br>REVISION<br>comments | <p>Author(s) have great ambition to write review paper of drought in Bangladesh with prospective mitigation approach. Unfortunately, attempt is not fulfilled. Autor(s) give to general, well known information.</p> <p>Introduction has some repetition, so deletion of some parts are suggested.</p> <p>Chapter 2 "Analyze cause and impact of drought hazards in Bangladesh" with subchapters 2.1-2.6 author(s) do not give any proper analysis of drought impact in Banglades. No facts, comparison. It looks like mere description of journalistic type.</p> <p>Given thematic guide for prospective mitigation approach is not visibe, neither explained in the paper. What is given in 2.7 "Drought mitigation approach" again repeat what is said in previous subchapters.</p> <p>References are not given either in alphabetical order or according to the appearance in the text.</p> <p>There are many repeated sentences (not word by word but with the same meaning). There are many typing mistakes.</p> <p>Author(s) should concentrate on Drought in Bangladesh. They should give some facts, results of previous findings, and based on facts to suggest mitigation approach.</p> | <p>Thank you for your valuable comments. It has been extensively revised according to your suggestion. Your all the comments was so constructive and scientific.</p>                        |
