**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Since multiple sclerosis (MS) is the interested disease in this study. Please add brief description of its signs and symptoms.</p> <p>Why is dielectrophoretic force the crucial factor for the etiology of MS disease? What are the possible confounding factors? How to design feasible experiments to further verify the conclusion in the future work?</p>	<p>Thank you for your valuable appreciations. They were very useful for me.</p> <p>I added information about the signs and symptoms of MS disease.</p> <p>I tried to give all possible brevity highlights. At least, the scientists who interested in the issue soon may understand the subject more comfortable.</p> <p>During the scan of MS disease with MRI scanners, the MRI device of <b>3 tesla</b> should be used. Otherwise, the MS symptoms can be confused with effects of MRI (Figure 1). I briefly explained these issues in the article. Therefore, there is no the RIS syndrome.</p> <p>I briefly explained these issues in the article.</p> <p>The Zamboni's reference has been deleted from the article.</p>
