

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

|                          |   |
|--------------------------|---|
| Journal Name:            | <a href="#">Advance in Research</a>   |
| Manuscript Number:       | Ms_AIR_18797  |
| Title of the Manuscript: | Flexural Behavior of lapped connections in multi-span cold-formed Z-purlins |
| Type of the Article      | Review Article  |

### PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)   | Authors' response to final evaluator's comments |
|--|---|
| <p>All previous changes and comments have been clarified, so there is no reason to ask for further information and deeper considerations about the article. Maybe, the last one consideration, but not too important, is the English grammar.</p> <p>Technically, is acceptable and consistent with current structural theories and the science of materials resistance, so I consider the paper acceptable for its publication.</p> |   |

### Reviewer Details:

|                                  |   |
|----------------------------------|---|
| Name:                            | Anonymous                                 |
| Department, University & Country | Polytechnic University of Valencia, Spain |
