SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Since multiple sclerosis (MS) is the interested disease in this study. Please add brief description of its signs and symptoms. Why is dielectrophoretic force the crucial factor for the etiology of MS disease? What are the possible confounding factors? How to design feasible experiments to further verify the conclusion in the future work?	
<u>Minor</u> REVISION comments	Fig1 is illegible. Please fix it.	
<u>Optional/General</u> comments
