SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	This is a well written paper. Few information is needed as follows;- - Add a paragraph to show that, at present, the tea oil growers is poor and poverty reduction program is needed, or they should be better off if follow the proposal of this paper. - Explain whether the growers realized that they have problems if the present situation prolongs and will they be ready to cooperate with the government in the program. (If the growers don't want to participate in the program, the government may have to pay more effort and budget for the change)	We added some paragraphs to manuscript
<u>Minor</u> REVISION comments	A more intensive studies on tea oil plantation to help solve small-scaled planted areas and market instability should be mentioned in the paragraph of conclusion	This is nice comment, which was added to conclusion section in MS
<u>Optional/General</u> comments	Estimate the amount of budget for government to take action in this project.	We were considering this point, but for current MS we cannot estimate because of data limitation, We may do it for next research.

SDI Review Form 1.6

	the paper clearly demonstrated through experiments that it is possible to increase grower's income by using intensive sivicultural approach, but the possibility of increasing growers' income is up to government urgent actions.	Yes, we are looking for actions from Government.
