SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	In Introduction should be add some literature review about the relationship between the human factor and types of land.	This comment is not very clear to me since the reviewer did not specify the human factor he has in mind. But I am not aware that land is graded before transaction takes place. Types of land (<i>sic</i> soil?) will only be useful if the research is in the area of Soil Science but for this paper, I do not see any loss in generality as far as the paper is concerned.
<u>Minor</u> REVISION comments	In Methodology, Should be adding textures of soil conditions of land used in this article.	The article is about land transactions and the type of soil or the texture is not one of the factors considered in the transactions. Hence the variable will not add any value to the paper.
<u>Optional/General</u> comments	In general, the manuscript article is acceptable for publishing by AJAEES.
