SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The results are not very specific with respect to activities. The emphasis is more on the econometrics than on the content. Covariation is not explained	The result generally aim to investigate the long run elasticities that may exist between the variables in ASEAN5 countries.
<u>Minor</u> REVISION comments	Which industries are most polluting and what about local subcontractors, for example in the automobile industry. Make the paper more accessible for the general reader	Will be considering in future research. Thank you.
<u>Optional/General</u> comments	Why separate FDI? Governments have other instruments to implement environmental policies, which should be the same for local and international companies, which are not taken into account In principle the ASEAN countries should create a level playing field between them and set their own standards	Thank you for the thought.
