SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	<u>In Result for SFA</u> Author/s must give Independent Variable value table before result of stochastic frontier analysis (average, maximum, minimum, standard deviation)(before the model result) Also the section in the risk analysis must be given Independent Variable parameters in the table (average, maximum, minimum, standard deviation))(before the model result)	The descriptive variable value tables were added in the Table 1a and 1b of the revised manuscript. However, as described in page 263 of the manuscript, the profit equation was used as the objective function for the risk analysis; therefore the variable value tables added serving for both the stochastic frontier analysis and the risk analysis.
<u>Optional/General</u> comments
