

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	2014_AJAEES_10429
Title of the Manuscript:	Accessing the Impact of Monetary Instrument towards Inflation in Malaysia

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Please reflect again on the abstract and correct some few sentences. 2. References are not consistent. i.e. the use of an author's two names while others are one e.g. Mallik G. and A. Chowdhury (2001) etc. 3. The conversion of the variables MS, I, etc to log forms and the DF, ADF and PP tests show that all the variables are I (0) except for some few hence the Johansen co-integration test and VECM shouldn't be appropriate instead VAR or SVAR should have been more appropriate other than that, the log form shouldn't have been taken. This is why I earlier suggested for evidence. 4. Up-to-date literature is still inadequate. 5. Grammar coherency should still be considered in general terms.	1. Abstract corrected 2. References recheck 3. The model fulfil the requirement to run using Johansen Juselius Cointegration test because all variable is found to be stationary at I(1) at first difference using more powerfull unit root : Phillip Perron test. We have transformed the variable into log form because those variables are time series data. Most time series data need to change into log form before undergo series of econometric analysis. Refer Tang (2004) 4. Add few more recent LR that focus on Malaysia 5. Recheck. Thank you very much for your valuable comment. We are very appreciated because it help us in learning process.
