

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Agricultural Extension, Economics & Sociology
Manuscript Number:	2014_AJAEES_10481
Title of the Manuscript:	Tanzania Economic Performance from Pre-Independence Period to Current Policy Reforms: Did we Purse the Right Way?

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The content is generally no in contention. However, here is considerable required in the organisation of the write-up. I have made specific comments in the text. But these are some: • Objective1; 2014 is still post (after) independence. Therefore, objective four becomes irrelevant. • Objective 3: This in my view is the key objective of the study. You therefore need to give it prominent attention. Present tables; the period and indicator changes and describe it(them). • Do away with the research questions completely. • Consider re-organising the section along the lines of the objectives outlined in 1.1. This will focus your discussions for easy readership. • Conclusions: These should be sub-sectioned to directly respond to the objectives. • Consider fully justifying text if the journal style allows it.	Objective 4 has been omitted as suggested. See page 2. Attention has been paid to objective number 3 since some indicators describing the period are indicated by Figures 1 and 2 on pages 6 and 9 respectively. Table I on page 8 also indicates data that try to explain objective 3. Figure 3 that has been added does plain objective number 3 as well. The research questions have been dropped as shown on page 2 The sections have been re-organized along the lines of the objectives as highlighted in yellow colour for subsections 3.1 and 3.3 on pages 5 and 10 respectively. In the conclusion section, a response to the objectives has been addressed as highlighted in yellow colour on page 14, though not in subsections. I don't buy the idea of having some subsections in the conclusion section. The text has been justified as per the requirement of the journal
