Subject: Re: Request for final decision for manuscript number 2013_AJAEES_7661

I read very carefully all the material. The first draft of the paper had some remarkable weaknesses. The reviewers made a very extensive reviewing of the paper and authors tried to address these comments. In the second round, the reviewers' opinions were conflicting. I agree that the paper could be improved more but I think that after a major and some minor corrections will be ready for publication, since generally meets the standards of the journal. My suggestions are:

MAJOR CORRECTION:

The part of the text: "Effective adoption of Information and Communication Technologies (ICT) now has a proven record in many parts of the world and a demonstrated potential to attain significant economic, social and environmental benefits at local, national and global levels (Ibid). The past four decades have witnessed numerous attempts to understand the mechanism of the Adoption of Technological Innovation. Rogers, (1995) provides a general framework of user acceptance of ICT which has been discussed by" belongs to Gelb et al.2008 (Adoption of ICT Enabled Information Systems for Agricultural Development and Rural Viability).

Authors MUST add this source and rephrase the above mentioned paragraph, otherwise this constitutes plagiarism. Also, in case they have used other parts of other researchers' works in the paper, authors MUST do the same.

MINOR CORRECTIONS

- 1) Too many times authors use sentences as separate paragraphs. This constitutes a problem for the overall image of the paper.
- 2) In the section "Results and discussions", the phrase "The age distribution of the respondents was quite even" does not make sense. Delete it.
- 3) Change "Results and discussions" to "Results and discussion".
- 4) A further language editing must be done.
- 5) The section "Recommendation" must be incorporated to the section "Conclusions" (not "Conclusion").
