SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The author mentioned the use of Focus Discussion in the report of the study, However, the author did not use this in the report of the study. This should be done to improve the study.	
<u>Minor</u> REVISION comments	Typographical errors should be corrected as seen in the paper.	
<u>Optional/General</u> comments	It is unfortunate that the author did not use any statistical tool to test relationship. I think the socio-economic characteristics of the participants can still be looked into in relation with some other variables. It is also of note that when appraising, one can still consider the factors influencing the interest of the 'students'. However, it is a good article.
