

Editor Comment:

Generally, this is an interesting and well written manuscript. Need some revisions: 1) Explaining the Keyword FGT. Normally a full name is given to the keyword; 2) the citations in text, especially in Literature review, would be better to change into popularly used way, namely using the author's name and publication time; 3) the subtitles in section 3 look a little strange. It should be 3 Methodology, and 3.1 Data and survey method, and below 3.1 should be 3.1.1 Sampling method....

Author's Feedback:

Thanks so much for the nice comments and for the corrections. The corrections have been effected as pointed out. The FGT in keyword has been fully written. The methodology section has also been addressed. However, the citations and dates in place of numbers is not yet addressed. This is because the authors guide for submission emphasizes the use of numbers instead of the citations and dates and this is what I followed. My previous publication (attached with submission) as well as other authors that published in AJAEES also followed the guideline instructions of using numbers. But if the use of citations and dates will be accepted please let me know so as to go ahead with it.
