**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<ul style="list-style-type: none"> <li>• Author described, "A baseline survey was conducted in 3 districts of the Upper East Region of Ghana to assess current postharvest practices and factors influencing long and bulk storage of maize". The area which covered by author were demographic information, cropping system, postharvest operation and losses, storage methods, pest management strategies. But in methodology, author did not mentioned about the approach or even the main considerations. I suggested to explain the section materials and methods clearly.</li> <li>• Storage methods and duration (Table: 10 and 11), it was not clear that is there any comparisons with package type and the storage duration. It is appropriate to mention the package type with storage duration, because the methods you described have different effects on stored products.</li> <li>• The title specifies the crop and it was not specific in objectives.</li> </ul>	<p>This area has been revised accordingly</p> <p>The aim of table 10 and 11 was to assess their preference for the storage methods and possible reasons for the preference which I believe it did.</p>
<b><u>Minor</u></b> REVISION comments	<ul style="list-style-type: none"> <li>• There are no any captions for the plates you given as well if you need to use plates for explanation use only the important plates which support to explain your findings.</li> <li>• Discussions related to other findings were not addressed.</li> </ul>	
<b><u>Optional/General</u></b> comments	Good work. Good effort. Some important considerations not clearly mentioned during presentation.
