SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The author should summarize the achievements presented in the article in such a way as it is now, they look weird. It is necessary to improve the language, as, for example, in Figure 2 there are no inscriptions in English.	I have changed the structure and to present the article in a standard view. I have combined the brief literature to introduction part, divided the Estimation Results into 2 parts: Methodology and Variables; and Estimation Educations. I have also reformatted the article following the standard template. All figures are revised with English inscriptions. The language in the whole article is also checked and revised.
<u>Minor</u> REVISION comments	The equations you need to check for autocorrelation, using, for example, Durbin-Watson statistic.	I have added tests for serial correlation in the Appendix (Table A.1).
<u>Optional/General</u> comments	Article desirable result to the standard view, add a section «Materials and methods» and «Discussion»	I have changed the structure and to present the article in a standard view. I have combined the brief literature to introduction part, divided the Estimation Results into 2 parts: Methodology and Variables; and Estimation Educations.
