PART B: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part and write here 'Corrected'/ if not agreed, give suitable justifications)
General comment:	Good manuscript	
Specific comments:	The author determines the relationship between Microbial quantity and enzyme activities of rhizosphere soil from different resistant eggplant cultivars, and resistance of eggplant to Verticillium wilt. The paper is very interesting because it defined the relative soil characters for disease resistance identification, and provided theoretical basis for soil environment management.
