

SDI Review Form 1.5

PART A:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	MS: 2012/AJEA/1544
Title of the Manuscript:	<i>Prevalence of coat colour phenotypes in West African Dwarf sheep reared by small holder farmers in South Western Nigeria.</i>
Manuscript received on (Date)	
Review comment submitted (Date)	

SDI Review Form 1.5

PART B: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part and write here 'Corrected'/ if not agreed, give suitable justifications)
General comment:	The manuscript is a straightforward description of coat colour morphology in the West African Dwarf sheep. The manuscript is important as a starting point for research on these sheep, but does not present any significant breakthroughs.	
Specific comments:	This is a descriptive paper of this breed, and coat colour is the focus, and for this reason the paper would clearly benefit from photographs or sketches of the colour morphs encountered by the researchers. This will give future researchers a baseline for research, and it is important to record these morphs as well as possible, if breeders do attempt to breed out certain 'undesirable' colour morphs.	Corrected (Photographs of sheep with different colour patterns have been included in Fig. 2)
Title and abstract	Ok	
Introduction	Ok	
Review of literature (Heading may differ in the case of review paper)	Ok	
Materials & methods (Heading may differ in the case of review paper)	Clear and concise
