PART B:

	FINAL EVALUATOR'S comments (if any)	Authors' response to final evaluator's comments
For comments of Reviewer 1 and author's feed back	Reviewer MV's main comments are treated satisfactorily. The statistical procedure is well documented and is clearer. The structure of the manuscript is better balanced. One last comment on the references: there have been some more recent references included, however some of the most relevant ones are missing. I can understand that the access to these bibliographic resources is not always evident. Therefore, I attach four papers that have recently been published in this domain, to be included in the discussion part of the manuscript.	
For comments of Reviewer 2 and author's feed back	Reviewers HS's comments are treated with satisfaction	
For comments of Reviewer 3 and author's feed back		
For comments of Reviewer 4 and author's feed back		
For comments of Reviewer 5 and author's feed back		
For comments of Reviewer 6 and author's feed back
