

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	MS: 2013_AJEA_3176
Title of the Manuscript:	NEEM (<i>Azadirachta indica</i>) SEED CAKE/KERNEL AS PROTEIN SOURCE IN RUMINANTS FEED

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In the first review the manuscript presented a lot of problems and received an opportunity to really improve. Unfortunately it returned for this next evaluation yet with poor quality considering the impact factor of the AJEA. Despite my previous suggestion about the revision from a native speaker, I still found many mistakes in the use of appropriate terms, as well as wrong words. I am not a native English speaker myself but in this second version I still found some unacceptable errors for an academic journal. Similar information was given in introduction and discussion. In general the manuscript is not well organized, the information is repeated in some points and the text and the discussion of the topics does not flow. My recommendations in the first version would have been useful, but some of them were not followed. There are too much unacceptable errors and poor quality for a second version. All comments can be seen in the comments of the attached file. The green color was inserted by authors.	All errors and mistakes as highlighted by the reviewer have been corrected and highlighted in yellow colour Information repeated in introduction and discussion have reorganised in accordance with reviewers advice. All Errors corrected as much as possible.
