

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment (If agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Provide actual nutrient content for manure use 2. Given the pH, the sites were different. The authors should discuss site effects 3. Authors should give basis for 6000 litres of water per ha. The soils and may have been over watered. 4. No concrete conclusion given	Nutrient contents of organic manures are expressed in %s. Not all the nutrients mineralised at the same time. Corrections have been effected. No conclusions added
Minor REVISION comments	1. Provide layout (expt.) 2. Correct anomaly on when fertigation was applied 3. Put initial soil and more analysis in tabular form 4. Manure analysis figures not complete 5. Page 5, line 157, remove reference to economical manure application since no analysis was done 6. Provide units of measure for table 2.	Corrections have been effected.
Optional/General comments	Major revision thereafter may be considered for re-submission. Authors also need help in English usage.	<u>Revised</u>
