

SDI Review Form 1.6

PART 1:

Journal Name:	American Journal of Experimental Agriculture
Manuscript Number:	2013_AJEA_3787
Title of the Manuscript:	Environmental Impact Assessment of Diversification of Crops in Ethiopia: A Case Study

General guideline for Peer Review process is available in this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Abstract does not contain sufficient information and the language is not appropriated. Not only in the abstract but along the text there are several grammar errors and sometimes is very difficult to understand what the author what to say. First sentence of introduction as no meaning at all. From the introduction it is not clear what the real aim of the study was. From the title I was expecting to have basic information and a background about how plant diversification could impact the environment, but not information was given. Some tables are present but they do have a title. The presented format is very confusing, the tables are poorly prepared I was expected to read about the impact of the project but the author presents future expected impacts. The presented text resemble more a project than a paper.	Abstract has been revised (pls see manuscript). Languages, introduction, background and the methods were revised (pls see manuscript) Title and number of the Table have included (pls see manuscript) The study of environment impact assessment leads to decide the tentative impact in future at the establishments of any project as in Ethiopia Establishment of large scale floriculture farms or processing plant for a cropped area of larger than 30 ha. The whole manuscript has been revised and the text has been reduced.
<u>Minor</u> REVISION comments
