- This form has total 7 parts. Kindly note that you should use all the parts of this review form.

SDI Review Form 1.6

PART 2: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The author should consider submitting the manuscript for language editing. Many grammar error Some references are too old eg. Snodgrass, 1970. This is 43 years old. Author should make conclusion based on the result of the study The introduction is not sound; author did not state why the study is important, what is the contribution of sugar production to the economy of Nigeria and the area under study. What is the research problem? Why the need for this study? The research methodology is too simplistic, the sample size is too small to generalise for the whole metropolis. Nothing is new here! The research is not adding anything new to the body of knowledge. Many studies have been done using OLS. The manuscript to me does not meet the standard and quality for publication in international journals.	Language editing done. References have been updated. Conclusion were based findings of the study. Contribution of sugarcane to the Nigerian economy stressed and its relevance in the study area emphasized. We don't advocate for complex methodology in recent time. There is no time when information on price is not important particularly in a market economy like Nigeria.
<u>Minor</u> REVISION comments
